► About **Absolute PDF Server**

Absolute PDF Server is the first enterprise level solution to offer PDF document extraction and creation in one. By employing a powerful, flexible and simple-to-maintain server side process, the entire organization, from end-users to the IT department, benefits.

Everyone will benefit from the ability to create PDFs and extract useable data from any PDF document. Productivity is increased and time is saved as users are able to do more with their electronic data.

With centralized control over PDF creation and extraction, the organization can ensure that PDF documents are utilized and shared in a manner that is consistent with internal corporate policies. The administrator can centrally determine permissions, document properties, and other document settings.

Absolute PDF Server

Business Benefits

Introducing Investintech's Absolute PDF Server, the first enterprise level document management solution to offer PDF extraction and creation in one, through a powerful, flexible and simple-to-maintain server-side process.

Absolute PDF Server saves your organization time by offering everyone the ability to create and extract their PDF files on demand, anytime. Time spent retyping, retrieving and reformatting data is eliminated. Productivity is enhanced. End users can transport PDF data into formatted Excel spreadsheets for analysis, editable Word documents for reversioning, HTML, Text and more. PDF files can be created from any printable MS Windows application and can be easily viewed and securely shared by anyone, internally or externally.

Unlimited Users, Unlimited Conversions Per Server

Everyone in the organization with access to a server where Absolute PDF Server is installed gets complete PDF creation and extraction capabilities. Absolute PDF Server was designed for multiple users and high volume conversions. As such, there are no limits, per server license, on how many conversions can be achieved throughout the organization.

A Standardized Document Management Framework

Absolute PDF Server offers a single, centralized electronic document solution that provides complete administrative control over how PDF documents are created within the organization. For the IT department, this dramatically simplifies the electronic document management process. The software is deployed once. Maintenance and updates are centralized. There is no desktop software to manage. The administrator has total control. Set permissions, document properties and security in accordance with the organization's document retention policies.

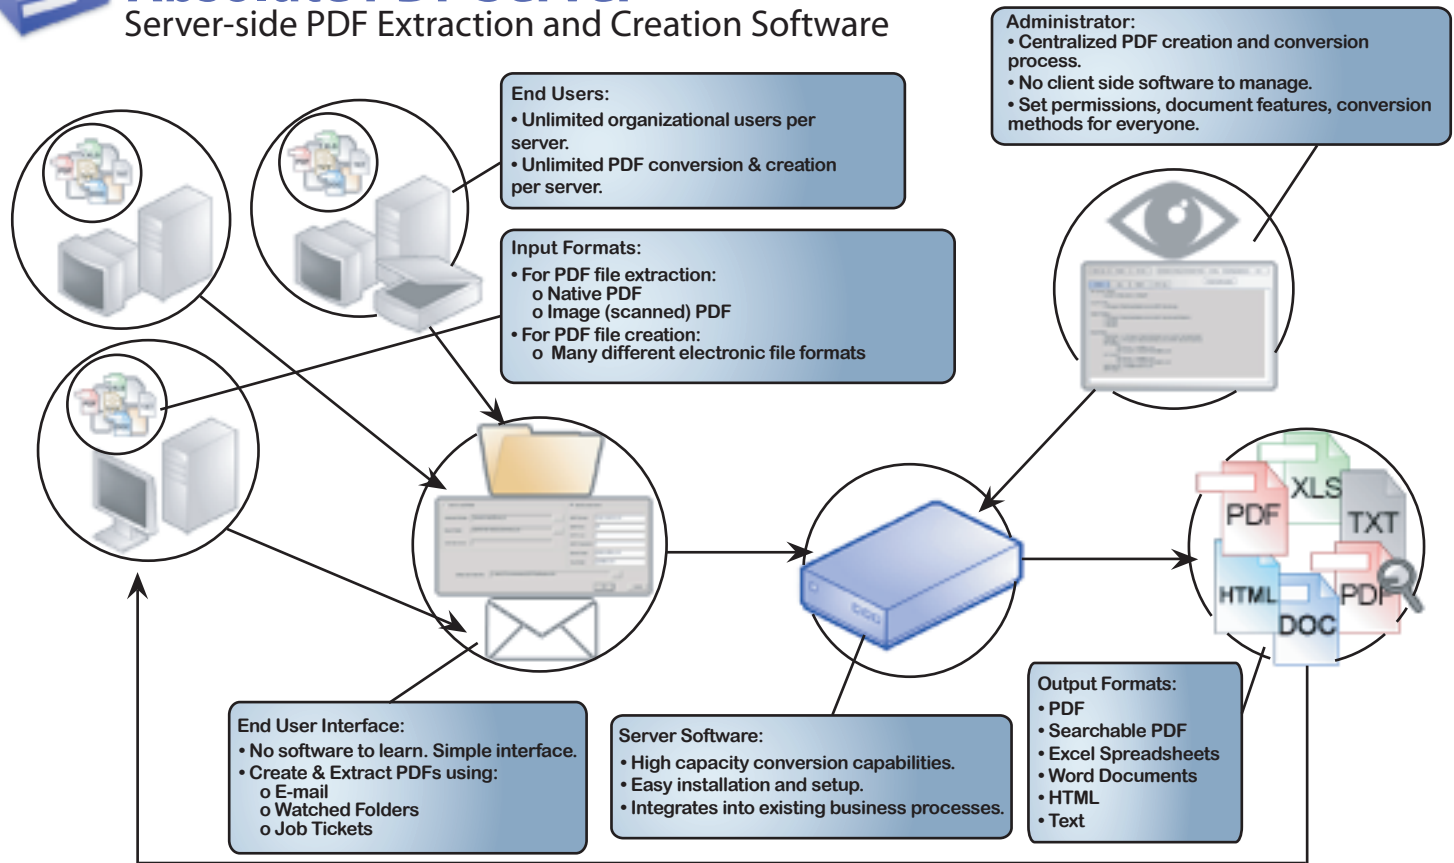

Full Suite of Benefits. One Price Per Server.

Absolute PDF Server is the first server-based enterprise product to offer round trip PDF capabilities. With our solutions, you'll get unmatched product functionality. There are no extra modules or add-ins to license. What you get is a fully featured product that can be used as much as needed per server for PDF creation and extraction, by anyone in your organisation.
